

Amy Denton

Motivated **Software Engineering** student with hands-on experience in **product & software development** and **QA testing**. Passionate about using technology, especially AI, to deliver value to customers while creating an intuitive and efficient user experience. Seeking an opportunity to contribute to a dynamic team by leveraging strong **product engineering, problem-solving, and collaboration skills** in a fast-paced environment.

EXPERIENCE

Otty.AI, Austin TX

August 2025 - Current

Associate Product Engineer

- Working with stakeholders to define and document product specs.
- Frontend engineering, currently prototyping with Cursor.

AuditBoard / FairNow.AI, Austin TX

March 2025 - Current

QE Engineering Contractor

- Creating and testing user stories and test cases for all features and functionalities to assure proper functionality and report bugs before release to customers, increasing app performance and reliability.
- Performing quality tests on all features in the app for each sprint.
- FairNow was acquired by AuditBoard, as the AI Governance Team.

BB Imaging, Austin TX

May 2024 - August 2024

Quality Assurance Engineer Intern @ TeleScan

- Enhanced user experience by refining a remote platform for sonographers to efficiently manage ultrasound sweeps, creating instructional pop-ups to increase training efficiency for new users.
- Developed and pitched a scalable business use case based on customer needs to the CEO, leading to integration into the next product development phase, and adding a chat application.
- Designed & executed comprehensive test plans to identify and resolve bugs, ensuring 90+ new features met high-quality standards.
- Created data extraction tool to pull images from microsoft teams to create a training data set for an AI diagnostics tool.

Tian Laboratory, College Station TX

January 2024 - May 2024

Undergraduate Research Assistant In Chemical and Biosensors Lab

- Designed scalable biosensors using polymer technology, enabling cost-effective deployment in resource-limited environments.
- Conducted data analysis to identify correlations and infer relationships between sodium ion concentrations in sweat and physiological stress indicators.

FRC 2468 and FTC 9048, Austin TX

August 2019 - June 2023

Manufacturing Mill Co-Lead & Subsystem Design Lead

EDUCATION

Texas A&M - Computer Science and Business Minor

August 2023 - May 2027

- Aggie Women in Computer Science
- Volunteered to create functional medical clinics from recycled shipping containers with BUILD TAMU and Biomedical Engineering Society.

Westlake High School, Austin TX

August 2019 - May 2023

GPA: 3.98

(512) 960-5823
